

About Futurekraft

We provide development and fundraising for small and medium sized churches, charities and social enterprises that desire sustainability and growth.

Growing Communities of Hope

We want to grow communities of hope. Where there is life; we want it to multiply. We want to see sustainable community projects with healthy relationships, a clear purpose and a direction for growth. We want to see real lives changed.

What makes us unique

This is our ministry. And our profession. We are a team of Christians, passionate about equipping the local church to transform communities. We have chosen to use our talents, gifts and skills to make a positive contribution to the world. We do this as a professional limited company. It's our job, and our calling. We love our work.

We are more than fundraisers. As the development partner, we see the bigger picture, connect the dots and help to prepare all aspects of a project for long-term sustainability and growth.

We won't work with everyone. We need to believe in the vision. We need to see potential for life to grow. Our clients will have the desire to respond effectively to identified community needs. Together, we want to see real lives changed.

We are willing to take risks. Working at the early stages of growth is risky. We recognise the possibility of failure, but we trust that our efforts will bear fruit. When the outcomes are this important, the risks are worth taking.

We work in the background. Our clients are in the spotlight. Our clients are the stars. We take a supporting role; empowering leaders, equipping the local church and enabling grassroots growth. Their success is our success.

Our profit is not at the expense of their mission. We celebrate our clients, and their unique mission to their community. We work hard to keep our services accessible to smaller projects because we know that their size doesn't define their significance.

Does this sound like your cup of tea?

If so, come and join our team.

"Futurekraft gives me the chance to make a lasting difference in many communities whilst working in a team where my skills are recognised and valued."

Thom Harper, joined the team in August 2017
